

**AMENDMENTS TO THE ABSTRACT**

Please replace the Abstract of the Disclosure of record in the application with the following Abstract of the Disclosure:

A high shrinkage side-by-side type composite filament which includes two kinds of thermoplastic polymers arranged side-by-side, one of said thermoplastic polymers having a boiling water shrinkage (Sr2) measured by the method (initial load = notified denier  $\times$  1/10g, static load = notified denier  $\times$  20/10g) of clause 5.10 of JIS L 1090 which is 20 to 75% of the boiling water shrinkage (Sr1) of the other thermoplastic polymer, measured by the method (initial load = notified denier  $\times$  1/30g, static load = notified denier  $\times$  40/30g) of clause 7.15 of JIS L 1013.
